

Environmental Policy

As a construction company operating in Hong Kong, we understand the impact that our activities can have on the environment. We are committed to minimizing that impact and promoting sustainable development through our environmental policy.

We will achieve this by:

1. **Compliance with environmental laws and regulations:** We will comply with all relevant environmental laws and regulations in Hong Kong.
2. **Energy conservation and efficiency:** We will promote energy conservation and efficiency by using energy-efficient equipment and technologies and encouraging our employees to use energy wisely.
3. **Waste reduction and management:** We will minimize waste generation by reducing, reusing, and recycling materials whenever possible. We will also ensure that all waste generated on our job sites is properly managed and disposed of in an environmentally responsible manner.
4. **Pollution prevention and control:** We will take measures to prevent and control pollution on our job sites, such as controlling dust and noise levels and properly managing hazardous materials.
5. **Sustainable materials and resources:** We will promote the use of sustainable materials and resources, such as renewable energy sources, recycled materials, and locally sourced materials, whenever feasible.
6. **Communication and reporting:** We will maintain open lines of communication with our employees, clients, and stakeholders to ensure that environmental concerns or issues are promptly reported and addressed.
7. **Continuous improvement:** We will continuously review and improve our environmental policies and procedures to ensure that they are effective and up to date with the latest environmental standards.
8. **Leadership commitment:** We will lead by example and promote a culture of environmental responsibility throughout our organization. Our management team will be actively involved in promoting and enforcing our environmental policies.

We believe that by following these policies and procedures, we can minimize our environmental impact and promote sustainable development in Hong Kong.
